4-Port Wireless Annex B ADSL2/2+ Modem Router

Product Overview

SMC7904WBRB4, is a highly integrated residential Internet access device which combines the function of Annex B ADSL modem, 802.11g 54Mbps wireless access point and 4-port 10/100 switch. It is fully compliant with latest ADSL2/2+ standards and TR-067 compliant, ensuring interoperability with your ISP's network infrastructure. The SMC7904WBRB4 provides high-performance Internet access, with downstream up to 24Mbps and upstream up to 2Mbps, making it ideal for residential users, home offices, and small businesses. With the SMC7904WBRB4, computers on the LAN side can communicate and share the Internet access and files via a wired or wireless network connection. The NAT firewall with Stateful Packet Inspection (SPI), Intrusion Detection System (IDS) & Denial-of-Service (DoS) provides robust security from hackers. VPN pass-through is also provided for securely connecting to your office or corporate network.

Key Features and Benefits

Enhanced ADSL2+ Technology
Instant, always on Internet connectivity for wired or wireless computers. The built-in ADSL2/2+ modem gives unrivaled asymmetric high-speed data transfer rates with up to 24Mbps downstream, 2Mbps upstream.
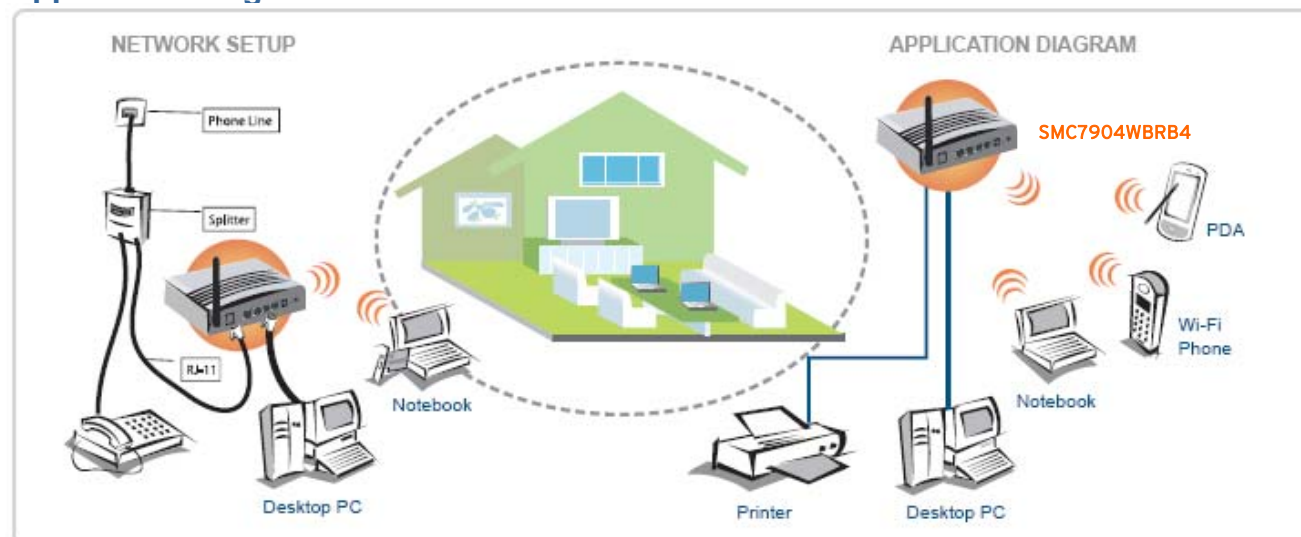

Robust Security and Firewall Protection from Hackers
The NAT firewall with Stateful Packet Inspection (SPI), Intrusion Detection System & Denial-of-Service provides robust security from hackers while VPN pass-through allows secure connectivity to your office or corporate network. Access Control Lists with URL blocking allow you to control access to Internet services & filter inappropriate web sites.

Quality of Service (QoS)
The SMC7904WBRB4 includes a build in QoS engine, which allow network administrators to allocate network resources and to prioritize real-time applications like voice & video, to enable smooth Internet phone (VoIP) and lag-free online gaming. WMM (WiFi Multimedia) delivers QoS to the wireless network, while IP QoS prioritizes outbound internet traffic.
